

Cosmetic Teeth Whitening Everybody's doing it!

best
businesses

WhiteScience Worldwide has set the industry standard for premium cosmetic teeth whitening internationally. After investing millions in product and delivery system patents, WhiteScience literally created a niche market. The resulting 20 minute teeth whitening system made it possible for vanity businesses and entrepreneurs to provide professional quality teeth whitening to the public, eliminating the need for in-office dental bleaching. They have achieved the delicate balance of convenience and affordability, without compromising quality.

The most recent division, Whitening on Wheels, was established for entrepreneurs wanting to take advantage of the exploding cosmetic teeth whitening industry, which has grown over 900% since 2006. In 2009, experts anticipate an excess of \$14 billion spent on teeth whitening product and services alone.

Perfect fit, unlimited opportunity.

Whitening on Wheels (WOW) business model is intentionally flexible, designed to meet the needs of investors at every level. Whether you are a seasoned entrepreneur or this is your first endeavor, your objectives and capabilities will be matched with a business plan to help you achieve your financial goals.

WhiteScience's innovative, portable equipment gives you the flexibility to offer teeth whitening events at salons, spas, tradeshows, resorts, malls, home parties, and fundraisers (to name a few). Additional income channels are available selling boutique retail products wholesale. Your earning opportunities are limited only by your imagination.
